 Managed workspace backups

## Hosted Workspace

Take advantage of the security, performance, and predictability of a hosted workspace from Aurora Cloud Technologies. Zero upfront investment, no hidden fees, and predictable monthly cost. You are in control of your desktops.

A hosted workspace from Aurora Cloud Technologies enables you to recognize the benefits of deploying virtual desktops in your organization without any of the pain and complexity. Full desktop experience.

Aurora Cloud Technologies provides your organization with all the infrastructure, networking, and security required to deliver virtual desktops to your end users, all in a secure SAE16 Type 2 certified data center, with 24x7 support, and an easy to use self service single pane of glass.

## Fully Managed Workspace

Want a desktop you can access from anywhere with zero management? We've got that too.

All the benefits of the hosted workspace with the added enhancement of 24x7 desktop management, patch management, active directory management, and managed backups. Customized CPU, GPU and storage solutions available on request.
